PROFESSIONAL SUMMARY

Final year Digital Arts (Wits) student majoring in Interactive Media, and Game Design with a strong background in **Front-end development** and **UI/UX design**. Skilled in building responsive, accessible, and user-centered digital interfaces with an emphasis on clean code, scalable component architecture, and intuitive interface design. Through freelance projects, I have gained experience collaborating with stakeholders to translating business and user needs into functional, visually engaging web systems, while collaborating effectively within multidisciplinary teams to deliver polished digital products.

EDUCATION

University of the Witwatersrand

2023 - present (Expected Graduation Jan 2027)

Bachelor of Arts Interactive Media (Software Development)

- Majors: Game Design, Interactive Media
- Coursework: Data Structures, Algorithms, Web Development, Database Systems, Software Architecture, Game Design

TECHNICAL SKILLS

Front-end web development

Proficient: HTML5, CSS3, JavaScript(ES6+), React.js, Vite, Git/GitHub, GSAP (GreenSock Animation API), REST APIs Integration, Responsive Design, Component-Based Architecture, Semantic Markup

Working Knowledge: Supabase

Tool & Workflow: VS Code, npm, Git, GitHub, Chrome Dev Tools

Performance & Accessibility: Web Accessibility (WCAG), Performance Optimisation, Debugging & Troubleshooting

UI/UX Design

Proficient: Interaction Design, User Flows, User Journey Mapping, User Personas, Interaction Design, Accessibility, Usability Testing

Tools & Workflow: Figma, Adobe Illustrator

Design Process: Low-Fidelity Wireframing, High-Fidelity Prototyping, Sitemaps, Design Systems, Style Guides

Visual Design (UI): Typography, Colour Theory, Layout Grid Systems

Business Analysis

Working Knowledge: BPMN Process Modelling, Business Process Analysis, Process Documentation

Tool & Workflow: Signavio

SOFT SKILLS

- Leadership
- Time management
- Problem solving
- Collaboration
- Adaptability & Continuous Learning
- Clear Technical Communication

ACHIEVEMENTS

University of the Witwatersrand

- Golden Key Honor Society (2024)
- Certificate of First Class – AFRL1003A: Elementary isiZulu Language and Culture IA (2023)
- Certificate of First Class – AFRL1004A: Elementary isiZulu Language and Culture IB (2023)
- Certificate of First Class – WSOA1003A: Film, Visual and Performing Arts IB (2023)
- Certificate of First Class – WSOA2021A: Film, Visual and Performing Arts IIA: Storytelling Across Media and Cultural Contexts (2024)
- Certificate of First Class – WSOA2023A: Digital Arts Practice II (2024)
- Certificate of First Class – WSOA2024A: Game Design IIA (2024)

Krugersdorp High School

- Vega School trophy for Flair in Design (2022)
- Silver certificate for excellence in academics (2022)
- Matriculated Top 20 - 6th place (2022)
- KHS Academic Certificate - Top Design student (2022)

WORK EXPERIENCE

FREELANCE & CLIENT-BASED PROJECTS

Front-End Web Developer / Graphic Designer | Ngengebule Attorneys Inc | Johannesburg | Dec 2025 – Mar 2026

- Designed and developed the firm's website from the ground up using React.js, creating a fully responsive, accessible platform that reflects the firm's professionalism and legal services.
- Built a scalable component-based architecture to improve maintainability, code reusability, and long-term project scalability.
- Implemented responsive layouts, intuitive navigation, and SEO-conscious development practices to improve the firm's online presence across desktop and mobile devices.
- Collaborated directly with stakeholders to translate business requirements into user-focused digital solutions while maintaining alignment with the firm's branding and objectives.

Graphic Designer | Lesakhi Investments | Johannesburg | Jan 2026 – Mar 2026

- Designed the company's complete visual identity, including logo systems, business stationery, branded documentation, and supporting marketing assets.
- Developed a cohesive brand identity that established a professional and consistent visual presence across client-facing materials.
- Worked closely with stakeholders to ensure branding aligned with the company's values, target audience, and long-term business objectives.

Graphic Designer | L&D Academy | Roodepoort | 2023-2024

- Built the company's brand identity from the ground up, including logo design, stationery systems, business cards, and supporting visual assets.
- Developed cohesive branding materials that aligned with the organisation's mission, values, and target audience.
- Ensured consistency across all visual communication to strengthen brand recognition and professional presentation.

Front-end Developer, Graphic Designer, 3D Modeller | Rahul Solutions | Roodepoort | 2023-2025

- Collaborated on freelance client projects, developing custom front-end solutions within WordPress and Elementor using JavaScript and CSS to extend platform functionality beyond default capabilities.
- Designed responsive, brand-aligned UI components and interactive web solutions tailored to client requirements and business goals.
- Developed visual identity systems for clients, including logo design, stationery, business cards, letterheads, and professional email signatures.
- Created a detailed 3D architectural environment and storage container visualization for LT Gas, modelling site scale, structure layouts, and branded environmental elements inspired by the company's visual identity.
- Worked closely with stakeholders to translate technical and creative requirements into polished digital and visual solutions.

KEY PROJECTS

ABSA NextGen Wealth Studio - Front-end Developer, Product Designer & UX Designer (Academic Project)

Stack: React, JavaScript, React Context API, CSS3, LocalStorage, Figma

- Developed a React-based financial planning platform comprising 10+ interconnected pages, including financial profiling, strategy management, educational content, and multiple real-time financial simulation tools.
- Implemented a modular financial calculation engine supporting SARS PAYE tax brackets, UIF, retirement deductions, medical aid tax credits, affordability analysis, and personalised financial recommendations through reusable utility modules.
- Architected cross-page state management using React Context and persistent browser storage, enabling a single financial profile to power dashboards, calculators, progress tracking, and personalised strategy recommendations without redundant computation.
- Built a milestone-based strategy system allowing users to select financial pathways, persist progress, calculate completion metrics, unlock contextual guidance, and maintain state across sessions using localStorage.
- Designed and implemented a reusable design system consisting of responsive components, custom sliders, financial data visualisations, interactive help popovers, and WCAG-conscious UI patterns supporting consistent experiences across desktop, tablet, and mobile devices.

The Pavilion - Front-End Developer, UI/UX Designer

Stack: React, JavaScript, React Context API, CSS3, LocalStorage, Figma

- Engineered a modular React e-commerce application using reusable component architecture, client-side routing, and dynamic rendering to deliver a scalable shopping experience.
- Integrated REST APIs to retrieve and display product data, implementing asynchronous data fetching, loading states, error handling, client-side caching, and persistent application state.
- Developed core e-commerce functionality including product discovery, category filtering, live search, favourites management, shopping cart persistence, and responsive checkout workflows.
- Designed the complete user experience through user research, personas, information architecture, wireframes, accessibility guidelines, and a mobile-first design system before translating designs into production-ready React components.
